Sprint 2 Report
SlugSync
Due: 5/7/24

Actions to keep doing:
- Longer meetings on Fridays are a good way to help each other and keep everyone on the same page.
- Keep our current schedule of standup on Monday, Wednesday, and Friday.
- Continue to communicate with team members and hold regular meetings to keep up with developments
- Set aside time in weekly meetings for learning/asking questions about the project.
- Keep attending TA meetings in person

Actions to stop doing:
- The team should try to keep scrum meetings under 15 minutes
- The team should stop doing one large commit at the end

Actions to start doing:
- The team should try to adopt the philosophy of many smaller commits and pushes rather than one big commit.
  - Smaller, more focused commits help reviewers better understand changes and lead to better feedback
- More team members could participate in the code review process so that all team members understand updates in the codebase.
-

Work completed:
- Tags on goals (3)
- User login testing (3)
- View all goals (3)

Not completed:
- User profile (5) (80% complete, need to do testing)
- Update a goal (5) (60% complete, need to complete functionality + test)
- User dashboard (5) (95% complete, need to resolve merge conflicts)

Work completion rate:
- 86.45%

Our lovely burnup chart
